Quality Assurance in Medical Education

A Practical Guide

Springer

Index

A

Accrediting team
  documentation, 6–7
  documenting outcomes, 18
  itinerary, medical school accreditation visit, 9
  meetings with students/trainees, 8
  members, 7
  preliminary team meeting, 7
  preplanned curriculum model, 25
  professional domains, 44
  resource allocation, 36
  site visits, 5–6
Admission policy and selection
  description, 49
  language of instruction and local health-care system, 50
  rating framework, 49
  specific support mechanisms, 51
  student numbers and background, 50–51
  support and counseling, 51–54
AMC. *See* Australian Medical Council (AMC)
Angoff method, 42–43
Annual staff retreats, 11
Assessment of learning
  instructional methods, 44
  methods chosen
    assessment plan, 41, 42
    authentic clinical examinations, 43
    criteria for usefulness, 42
    knowledge and skills, 41
    results obtained using Angoff method, 42–43
  planned timing, 44
  policy, described, 39–40
  present-day approaches, 44
  quantum and timing of assessment, 43–44
  regular assessment, 41
  rules and regulations, medical school and parent organization, 40
  working groups, assessment committee, 45
  workload associated with, 40
Australian Medical Council (AMC), 1, 14, 25, 33–34

B

Barriers to change, 3

C

Context and change
  external review, 2–3
Context and change (*cont.*)
  "outcomes-focused" curriculum, 3
  quality assurance visit, 2
Coordination, quality assurance process
  activities, Department of Medical Education, 5
  annual curriculum retreat, 5, 6

G. MacCarrick, *Quality Assurance in Medical Education*, DOI 10.1007/978-0-85729-713-6,

elements, successful leadership, 4
medical education units, 4
quality assurance review, 4
Curriculum content
AMC recommendation, 33–34
clinical rotations, 32–33
complexities and dilemmas, clinical practice, 32
health-care delivery, 35
portfolios use, 32
scientific principle, 31
Student Fitness to Practice Working Group, 35
use, skills centers, 34
Curriculum database
CurrMIT©, 19
documenting, 19
eMed©, 19
excel spread sheet, 19, 22
learning activities by week, block, and year, 19, 20
teaching and learning activities, 19, 21

D
Documenting outcomes, 18

E
Educational program
affective and psychomotor domains, 30
ambulatory care and community setting, 30–31
curriculum content (*See* Curriculum content)
curriculum method, 27
elective programs, 31
Harden's SPICES model, 28
management
central curriculum committee, 36
quality assurance process, 36
school's alumni office, 36–37
overview, 25, 26
placement, electives and research opportunities, 25
preclinical to clinical sequence, 30
strategies, 28
student/trainee learning, 29
week-by-week instruction, 26–27
Educational resources
facilities, 62–63
health-care settings, 64
information and communication technology, 64
IT-related infrastructure, 64–65
library, 63
teaching sites, 62, 64
Evaluation, medical school program
collection, evaluation data, 72
feedback from alumni, 75
graduate surveys, 73
membership, medical school evaluation committee, 76
ongoing program evaluation, 72
performance data, 76–77
principles, 73
questionnaire used to survey student satisfaction with tutorials, 73, 74
"rolling" cycle, 73
stakeholder group, 77
terms of reference, 73
types, evaluation tools used, 73
External review, 11

F
Faculty
academic environment, 61
academic staff, 59
administrative and technical staff, 59
detailed staff plan, 57–58
hospital and community-based practitioners, 60
human resource policies, 58–59
performance management, 58
postgraduate trainers, 59
short courses, 60–61
table of contents for orientation manual, 61, 62

teaching portfolio, 59–60
"Fitness to practice" committees, 53

G
General Medical Council (GMC), 1, 10
GMC. *See* General Medical Council (GMC)
Governance structure
access to committee meeting agendas and minutes, 68
administrative staff, 70
arrangements, autonomy and control, 68
budgetary responsibility and accountability, 68
curriculum committee, 67
curriculum reform efforts, 70
departmental-based governance to centralized governance, 67–68
engagement with stakeholders
competition, service demands vs. training, 72
health-care systems, 71
membership, medical school advisory committee, 71

L
LCME. *See* Liaison Committee on Medical Education (LCME)
Liaison Committee on Medical Education (LCME), 1, 10, 11

M
Medical school resources
educational resources, 62–65
faculty (*see* Faculty)
Mission and outcomes
AMC's goal, 14
curriculum outcomes, 15
documenting (*see* Documenting outcomes)
feedback process, 16
international competency frameworks, 16
statements, 13
use of *themes*, 16–17
valuable feedback, 17–18
WFME "basic" standard, 14
WFME "quality" standard, 14

O
"Outcomes-focused" curriculum, 3

S
Standards used
Committee on the Accreditation of Canadian Medical Institutions, 10
Standards used (*cont.*)
GMC standards, 10
LCME standards, 11
WFME standards, 8–10
Statements, medical program mission, 23
Support and counseling, admission policy and selection
face-to-face meetings, 52
"fitness to practice" committees, 53
health related problems, 54
mentoring schemes/personal tutors, 52
physical and emotional demands, 51
regular formal and informal meetings, 53
student activities, 53
student indebtedness, 54

T
Teaching portfolio, 59–60

W
Week-by-week instruction, 26–27
